

## Meopham 'How Things Work' Group Visits Rochester Airport: (November 20th 2015)

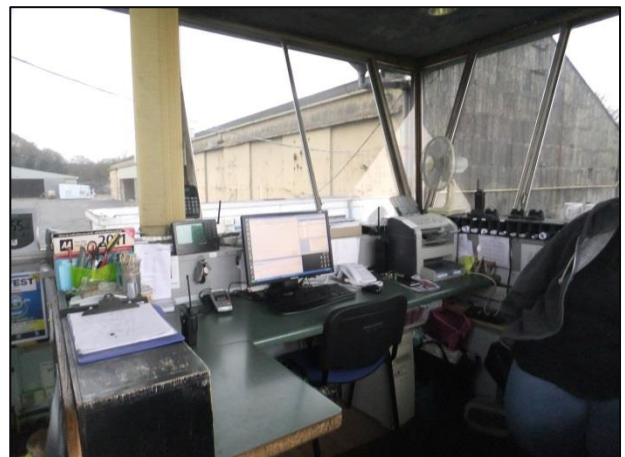

On 20<sup>th</sup> November 2015 the Meopham U3A "How Things Work" group had an interesting visit to ROCHESTER AIRPORT to find out how it worked.

We were given a guided tour by Mr Kelvin Carr, the airport manager.

We were also able to enjoy a break in the Airport's Café.

In the hangers we saw a host of aircraft including gyroplanes, Piper Cubs, & warbirds owned by Dave Gilmour of Pink Floyd; in the control tower we learned a little about air traffic control . . .

The event ended with a visit to Medway Aircraft Preservation Society (MAPS) where we were shown around by Philip Cole. We saw work in hand on the restoration of a very early Shorts Brothers Scion airliner.
